DETAILED ACTION

Status of Claims

In response to the Preliminary Amendment filed 9/15/04, Claims 1-31 are cancelled. Claims 32-55 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 32-40, 42-52, and 54-55 are rejected under 35 U.S.C. 102(b) as being anticipated by Mortimer et al. (US 6,091,930).

1. [Claims 32,44]: Regarding Claims 32 and 44, Mortimer discloses storing at least one document (i.e., knowledge base) in a storage medium of a device (i.e., student CITbook). See Col.7: 1-13. Mortimer discloses displaying (i.e., presenting) the at least one document (i.e., presented text). See Col.7: 14-16, 27-31. Mortimer discloses generating at least one modification (i.e., notes) to the at least one displayed document created by a user of the device, wherein the at least one modification is displayed to the user as an integral part of the at least one document. See Col.7: 27-31. Mortimer discloses storing the at least one modification separate (i.e., implied by "links") from the at least one document in the storage medium so that the at least one modification can

be separately categorized, search, or retrieved and correlating the at least one document and the at least one modification. See Col.7: 27-31 and Col.17: 67-Col.18: 6. Mortimer discloses an input device (i.e., note module) which generates at least one modification to the at least one displayed document created by a user of the device, wherein the at least one modification is displayed to the user as an integral part of the at least one document. See Col.7: 27-31. Mortimer discloses a processor which correlates the at least one document and the at least one modification. See Col.5: 13-19.

- 2. [Claims 33,45]: Regarding Claims 33 and 45, Mortimer discloses categorizing the at least one document in automatic mode where the at least one document is automatically categorized; or manual mode where data is received from a user that identifies a category with which the at least one document is correlated. See Col.7: 27-31.
- 3. [Claims 34,46]: Regarding Claims 34 and 46, Mortimer discloses an automatic mode where the at least one modification is automatically categorized; or a manual mode where data is received from a user that identifies a category with which the at least one modification is correlated. See Col.7: 27-31.
- 4. [Claims 35,47]: Regarding Claims 35 and 47, Mortimer discloses wherein the storage medium includes a plurality of documents (i.e., presented text) and a plurality of modifications (i.e., notes) stored thereon. See Col.7: 29-31.

Application/Control Number: 10/661,046

Art Unit: 3714

5. [Claims 36,48]: Regarding Claims 36 and 48, Mortimer discloses generating a personalized summary (i.e., outline) of an experience based on categorization of the at least one modification made to the documents. See Col.17: 67-Col.18: 3.

Page 4

- 6. [Claims 37,49]: Regarding Claims 37 and 49, Mortimer discloses accessing at least one resource (e.g., knowledge in areas in which they may be lacking sufficient background information to comprehend the material presented). See Col.7: 16-19.
- 7. [Claims 38,50]: Regarding Claims 38 and 50, Mortimer discloses receiving a series of modifications (i.e., changes), wherein the series of modifications are made by a third party (i.e., professor). See Col.14: 58-61.
- 8. [Claims 39,51]: Regarding Claims 39 and 51, Mortimer discloses generating a personalized summary (i.e., outline) of at least one educational experience. See Col.17: 67-Col.18: 3.
- 9. [Claims 40,52]: Regarding Claims 40 and 52, Mortimer discloses transforming the at least one document from one form to another form (i.e., outline form). See Col.18: 43-46.
- 10. [Claims 42, 54]: Regarding Claims 42 and 54, Mortimer discloses generating at least one outline of the at least one document based on at least one modification made to the document. See Col.18: 43-46.
- 11. [Claims 43,55]: Regarding Claims 43 and 55, Mortimer discloses generating a review (i.e., outline) of the at least one document based on the at least one modification. See Col.17: 67-Col.18: 6.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negatived by the manner in which the invention was made.

Claims 41 and 53 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Mortimer in view of Takeda et al. (US 5,349,368).

[Claims 41, 53]: Regarding Claims 41 and 53, Mortimer does not disclose expressly

translating the at least one document from a first language into a second language.

However, Takeda teaches such in Col.2: 54-57. Therefore, at the time of the invention,

it would have been obvious to one of ordinary skill in the art to incorporate translating at

least one document from a first language into a second language into the method and

system of Mortimer, in light of the teaching of Takeda, in order to provide a technique

for interpreting the meaning of a natural language.

Citation of Pertinent Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.
